DEUTSCHE BANK, New York, NY

PROJECT: INFORMATION DELIVERY\DATA SERVICES NY, GLOBAL OLAP REPORTING PLATFORM

May '99 to May 2004

Data Services is the centralized MIS and Information Delivery Group for the entire bank. The group's data warehousing\reporting platform supports the financial, HR and Regulatory analysis and reporting needs of the bank.

- *Developed the Overall Strategy and Vision for the platform*
- *Architecture lead for reengineering legacy data warehouse*
- *Designed infrastructure architecture for the platform*
- *Migrated legacy environment to fully productionalized environment including Dev, Test, High Availability and DR capabilities*
- *Evaluated and recommended hardware, tools and third party systems to meet performance and manageability goals*
- *Designed and implemented innovation that separates the Essbase batch process from the user query process on separate servers, presented this solution jointly with Deutsche Bank, at global user conference*
- *Evaluated, Tested and Certified HyperRoll for production worthiness.*
- *Migrated select Essbase databases to HyperRoll*
- *Represented Deutsche Bank at every Hyperion Customer Advisory Board Meeting, since board inception*

STANDARD CHARTERED BANK, Singapore

PROJECT: BASEL II DATA WAREHOUSE

Jan '03 to present

The system is for the BASEL II Risk Accord. This was an implementation of the metaController.

- *Architected and Managed the project implementation, with partners in Singapore*
- *BI Systems Managed*
 - *Data Source Management (2000+ Feeds)*
 - *Ascential Datastage ETL*
 - *IBM DB2 Business Data Warehouse*
 - *ILog Rules*
- *ROI*
 - *Zero scripting resulted in 4 man month reduction in implementation time*
 - *Metadata driven process definitions allowed day to day maintenance be outsourced*
 - *Rule based process links allowed major process logic changes to be done by business*
